Education

Zagazig University   Sep. 2012 − May 2016
Faculty of Commerce Bachelor's degree   *Zagazig, Sharqia*

Relevant Coursework

- I took a Front-end course at Route, where I worked on projects and completed various tasks.

Experience

Black Waves   January 2025
Front End Developer   *Mitghamer, Dakahlia*

- "I have good experience in Front-End development, and I can implement UI with precision while thinking logically to develop the necessary functionality. I have worked on many projects before joining Black Waves."

Projects

eLearning / *Next, Tailwind, TypeScript , shadcn/ui*   February 2025

- I worked on a website for a teacher, where I focused on designing a user-friendly and functional interface.
- The site includes features like course listings, interactive schedules, and an easy-to-navigate layout.
- I utilized modern front-end technologies to ensure the site is responsive and provides an excellent user experience.
- Additionally, I made sure the website is optimized for performance, allowing quick access to information. The project was aimed at helping the teacher manage content and communicate effectively with students.

quarer / *Next, Tailwind, TypeScript , shadcn/ui*   March 2025

- I worked on a website for a business specializing in cosmetics, perfumes, watches, accessories, and gifts. My role was to create an engaging and easy-to-use platform that showcases the wide range of products offered.
- The website includes features like product categories, a product filter system, an intuitive shopping cart, and a smooth checkout process. I made sure to provide clear product descriptions, high-quality images, and customer reviews to enhance the shopping experience.
- I used modern front-end technologies to make the website fully responsive, ensuring it works seamlessly on desktop and mobile devices. This helps customers easily browse and shop from any device.
- I focused on optimizing the website for speed and performance, providing quick loading times and smooth navigation. The site was designed to help the business reach a larger audience, improve product sales, and offer customers a pleasant shopping experience.

Daniels / *JavaScript, Bootstrap, Css, Html*   October 2024

- "I completed a project as part of an exam at Route Institute, where I was tested on Bootstrap. I scored 99 out of 100, demonstrating my strong proficiency in using Bootstrap to create responsive, user-friendly websites. The project required me to apply Bootstrap's grid system, components, and utilities to build an effective and well-structured web design."

Technical Skills

Languages: HTML, CSS, JavaScript, Bootstrap, jQuery, Tailwind CSS, React, SASS, TypeScript, Next.js
Developer Tools: VS Code
Technologies/Frameworks:Jira ,GitHub , Git

Leadership / Extracurricular

- I have worked in various roles before I started learning programming, which has helped me develop strong problem-solving and communication skills. These experiences taught me the value of hard work, responsibility, and the ability to work under pressure. Since transitioning to front-end development, I have focused on continuously improving my skills and gaining hands-on experience with modern technologies. I am now able to leverage my diverse background to tackle challenges in the tech industry with a strong work ethic and a keen eye for detail.
